

## SERVICE PATHWAY

# LEAD THE FINANCE FUNCTION

## Executive Finance Leadership & CFO Advisory

*Experienced financial leadership for organizations that need stronger governance, sharper decisions and a finance function capable of enabling strategy and performance.*

### The value I provide

I support Boards, CEOs, business owners and finance leaders in strengthening the role, capability and impact of finance. I combine executive judgment with hands-on experience across governance, major capital programmes, finance-function development, ERP-enabled transformation, data and team leadership—helping finance move beyond reporting to become an active partner in enterprise performance.

### Who I support

**Boards, CEOs & owners**

Independent financial insight, options and decision support.

**CFOs & finance leaders**

Function maturity, team leadership and transformation guidance.

**Government & infrastructure entities**

Governance, capital-programme control and institutional capability.

**Groups & family businesses**

Scalable finance, performance visibility and succession readiness.

### Challenges I help address

- Finance is focused on transactions and reporting, with limited influence on strategy or performance.
- Leadership lacks timely, reliable insight into cash, cost, profitability, capital commitments or risk.
- Budgeting, forecasting, management reporting and accountability are fragmented or inconsistent.
- Governance, delegation, controls or finance processes have not kept pace with growth and complexity.
- ERP, data or transformation programmes require credible business-side leadership and adoption.
- The finance team needs stronger leadership capability, role clarity, succession or change support.

### How I can help

**CFO & executive advisory**

Finance strategy, executive counsel, options analysis and decision support.

**Finance-function leadership**

Operating model, role clarity, organization design and maturity roadmap.

**FP&A & performance**

Planning, forecasting, scenarios, KPIs and management information.

**Governance & control**

Delegations, policies, internal control, risk and accountability.

**Capital & mega projects**

CapEx governance, portfolio visibility, commercial control and asset handover.

**ERP, data & analytics**

Business-led implementation, reporting, dashboards and decision support.

**Team & succession**

Leadership development, capability transfer and sustainable ways of working.

**Flexible executive support**

Interim, fractional, transformation-focused or special-advisory mandates.

### Expected value and outcomes

- A finance function aligned with enterprise priorities and accountable for measurable performance.
- Higher-quality Board and executive decisions supported by clear financial insight.
- Stronger control, transparency and ownership across operating and capital activities.

- More reliable planning, forecasting, reporting and performance visibility.
- A more capable, confident and business-oriented finance leadership team.
- Transformation that is embedded in processes, systems, data and people—not left as a report.

## Relevant executive credibility

More than 35 years across Qatar, the UAE, Saudi Arabia and Egypt, including Arthur Andersen and Ernst & Young environments; senior finance leadership in ports, infrastructure, real estate and petroleum-port and marine operations; and more than a decade supporting government finance transformation in Qatar. Relevant experience includes finance-team leadership, major capital programmes, FP&A, governance, asset lifecycle, Oracle EBS and Microsoft Dynamics implementations, visualization and analytics, and Technical PMO delivery.

## Ways to engage

Executive advisory retainer • Finance-function diagnostic and roadmap • Interim or fractional CFO support • Transformation or recovery mandate • Capital-programme governance review • CFO/team development
